

GEHR PBT[®]

1. Manufacturer		
	GEHR GmbH Casterfeldstraße 172 68219 Mannheim Deutschland Tel. +49 621 8789-0 Fax +49 621 8789-200 Info@gehr.de www.gehr.de	
2. Product description		
Article:	Engineering semi-finished product	
Abbreviation	PBT	
Material characterisation	Thermoplastics	
Main components	Polybutylenterephthalate contains possibly pigments, stabilizers and additives	
Marking obligation components	none	
Classification according REACh	Product	
Classification according REACh 3. Product properties	Product	
	Product Rods, sheets / solid	
3. Product properties		
3. Product properties Form / condition	Rods, sheets / solid	
3. Product properties Form / condition Colour	Rods, sheets / solid natural, other colours on request	6
3. Product properties Form / condition Colour Odour	Rods, sheets / solid natural, other colours on request odourless	
3. Product properties Form / condition Colour Odour Density	Rods, sheets / solid natural, other colours on request odourless 1,2 – 1,35 g/cm ³	
3. Product properties Form / condition Colour Odour Density Melting temperature	Rods, sheets / solid natural, other colours on request odourless $1,2 - 1,35 \text{ g/cm}^3$ ca. 220-230 °C	
3. Product properties Form / condition Colour Odour Density Melting temperature Thermal decomposition	Rods, sheets / solid natural, other colours on request odourless $1,2 - 1,35 \text{ g/cm}^3$ ca. 220-230 °C > 290 °C	

Possible decomposition products secure the contact with acids and acid-forming products, chlorinated hydrocarbons and hot water.

4. Handling and storage

Machining	The product can be machined with standard machinery and tools. Before machining the product should be stored at room tempera- ture 24 h. Evacuate swarf to prevent slipping or tripping. Observe the maximum allowable concentration of dust and formal- dehyd levels on the working area which apply in your country. Wear safety goggles during machining. General dust limit value: Respirable dust (6 mg/m ³⁾ ; Inhalable dust (10 mg/m ³).
Storage	The products shall be stored indoor to keep away from any source of degradation such as sunlight, UV-jets, ionizing radiation, chemicals,
Safety measures	the general industrial safety measures should be considered. A thermal damage during machining should be avoided.
5. Fire-fighting measures	
Suitable extinguishing agents	Water, foam, dry chemical, carbon dioxide (CO ₂).
Potential combustion products	Carbon dioxide (CO_2) , carbon monoxide (CO) and formaldehyde (CH_2O) . Formation of further decomposition and oxidation products depend upon the fire conditions. Under special fire conditions traces of other toxic substances are possible.
Special protective equipment	Wear a self-contained breathing apparatus. If exposed to combus- tion fumes bring the victim into fresh air.
Further information	Dispose of fire debris and contaminated extinguishing water in accordance with official regulations
6. Disposal considerations	
European waste catalogue	According to the "European Waste Catalogue and Hazardous Waste List" uncontaminated waste from the products is not classi- fied as hazardous.
Waste disposal	If recycling is not possible, waste disposal by landfill or incineration in compliance with state and local regulations.

7. Marking and guidelines

Marking in accordance with EEC guidelines	Not subject to labelling
Other guidelines	none
Transport regulations	Not classified as hazardous good under transport regulations

8. Other information

According EG directive 1907/2006/EG (REACh), our products are clearly defined as articles, exempt from registration. The European regulation (EV) about chemicals, which came into force June 1st 2007, prescribes Material Safety Data Sheets (MSDS) only for dangerous substances and preparations. According REACh we are manufacturing articles and we are not required to issue MSDS.

All above mentioned information are based according to today's state of knowledge and supply no warranty of quality. Existing laws and regulations have to be observed by the recipient of our products on his own authority.
